	Burndy Bridge The Chord Company Bridge upgrades the lightweight, unshielded shorting plug supplied with audio streaming equipment, offering a no-compromise, noise-reduced connection. It features a machined heavy-gauge aluminium case for both acoustic and electrical isolation. The Taylon® insulated wiring and resin-dampened internal assembly further increase this isolation.	625,00
	GroundArray Reduces the noise level in hifi products. Simply connect GroundARRAY to an empty socket on your hifi equipment. The advanced technologies provide a very low-impedance, high-bandwidth route for HF noise to pass into, effectively 'pulling' noise from the signal ground of the host equipment. Works with different types of A/V equipment, available with different plug adaptors: RCA; DIN; BNC; RJ45; USB Type-A and XLR male and female.	690,00
	PowerArray EU Chord Company PowerARRAY is a next-generation noise reduction/absorption device. PowerARRAY can be connected to unused mains power sockets (wall or distribution block) adjacent to those used to power your hi-fi equipment, providing a low-impedance escape route for HF noise, reducing the amount entering a hi-fi system, lowering the noise floor and leaving more space for the music.	690,00
	PowerHaus The Chord Company PowerHAUS mains block is the distillation of decades working with signal and power transfer and benefits from a unique version of our acclaimed ARAY technology (MainsARRAY) which has been specially adapted for power distribution.
